

GEMNautilus®

“Your Premier Supplier For Sheet Extrusion”

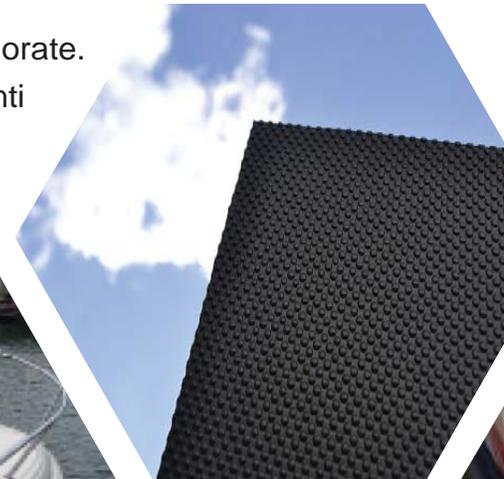

GEMNautilus®, our marine grade HDPE sheet ranging in thickness from .200” to 1.25”. Our sheet is a durable, consistent sheet that is easy to clean, impervious to water and resistant to harsh weather environments. Lightweight material is also available with our marine sheet GEMNautilus LT®. All of our marine grade HDPE is lab tested in house for UV and weather exposure per ASTM guidelines.

Why GEMNautilus®?

GEMNautilus® will not rot, discolor, delaminate, rust and ultimately deteriorate.

GEMNautilus® can also be made with GEMTread® and Tuff Tech®, our anti slip textures. These textures can also be combined with hybrid resins to make the material into anti-skid. Perfect for decking, ladders, and any area that water accumulates.

Why keep replacing your old, weathered projects year after year with inferior wood products? Make it a “One Time” job with GEMNautilus®.

- ✓ Weather Resistant
- ✓ Easy Fabrication
- ✓ Superior To Wood
- ✓ FDA Approved For Food Contact
- ✓ UV & Weather Testing Available
